

Safety of Navigation in a Digital World

Data management, applications, and services

Tokyo, Japan, Monday November 06th, 2023, from 1300 to 1700

The seminar's objective is on the one hand to provide information on IALA, its technical committees, and its World-Wide Academy and on the other hand to provide information on data management, applications and services which IALA members need to consider in the future.
